

Moody International ZAO Russia Grants 100th Certificate of Compliance

The Certification division of Moody International Russia celebrated as they issued their 100th certificate in February of this year!

This certificate was issued to “Stroytransgas-M” LLC, subsidiary of “Stroytransgas” CJSC, for fulfillment of construction and installation work at industrial and civil facilities, and for passing the audit of compliance with ISO 14001 requirements.

The ISO 14001 standard is primarily concerned with environmental management. The standard is aimed at decreasing environmental harmful impacts during product manufacturing and processing. Overall it covers environmental impacts which include resource consumption, polluting emissions, impact on human health and the environment.

Experience shows that implementation of these standards not only raises the company to a new level of environmental safety but also serves as a powerful source of company profits due to optimization of resource work.

Moody International Russia possesses the unique experience in creating quality management systems for the industrial sector. Moody International's clients range from very large multinational companies to small and medium business and state enterprises. Moody International specialists assure convenient direct contacts as well as fast and experienced services. The company as a whole has conducted over 50,000 successful certifications all over the world and now Moody Russia can join in the accomplishments with this 100th certificate achievement.

Moody International's activities are aimed at effective operation of implemented systems. Clients can rely on Moody's experience and knowledge as support is provided before and after certification.

Congratulations to Moody International ZAO Russia for this great milestone!
